### Description

The filters have incorporated several unique design features to minimise differential pressure and provide a filter and element combination where the differential pressure starts low and stays low to maximise energy savings and provide the lowest lifetime costs without compromising air quality.

### Features

- For the removal of bulk liquid, water and oil aerosols, atmospheric dirt and solid particles, rust, oil vapour, and micro-organisms
- Coalescing filter performance tested to the stringent requirements of ISO12500-1, ISO8573-2 and ISO8573-4
- Dry particulate filter performance tested in accordance with the requirements of ISO8573-4
